

ACCURATELY MEASURE YOUR WATER USAGE

Change your water filter exactly when you need to with the Flow Totalizer.

Save time and money on unnecessary filter replacements by keeping track of your treated gallons with the Flow Totalizer. Water plays a significant role in the taste of beverages and food. High-quality menu items need high-quality ingredient water, making the right water filtration solution a critical part of any operation. The Flow Totalizer helps reduce costs by keeping track of treated gallons which means you'll save money on unnecessary filter replacements and time on quarterly and annual maintenance.

Flow Totalizer

Mounting Bracket

Sustainability

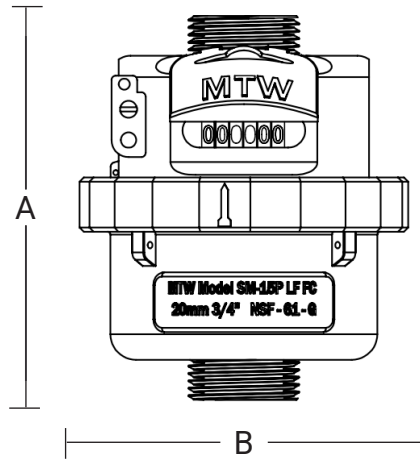

Minimize your use of carbon cartridges - greatly reducing your carbon footprint and landfill impact

Measure

Track your usage and know when to change your filter

Flow Totalizer | FT

Features:

- Keeps track of lifetime water usage
- Contains oscillating piston that measures gallons (flows from 0.25 gpm - 15 gpm)
- Can be mounted horizontally or vertical
- Includes built in strainer
- Optional mounting bracket - PN 7002801
