

# HABCO™

*...Driving Cold Space™ Innovation from  
Commonplace to Invention!*

HABCO® insulates all cabinet walls to the floor for **Structural Rigidity**. All cabinets are structurally foamed-in-place with the most up to date, **Environmentally Sound Water Blown Insulation** up to 2.25" thick.

HABCO® pioneered the use of **Environmentally Sound Refrigerant (134a)** and continues to be reach-in refrigeration's innovator.

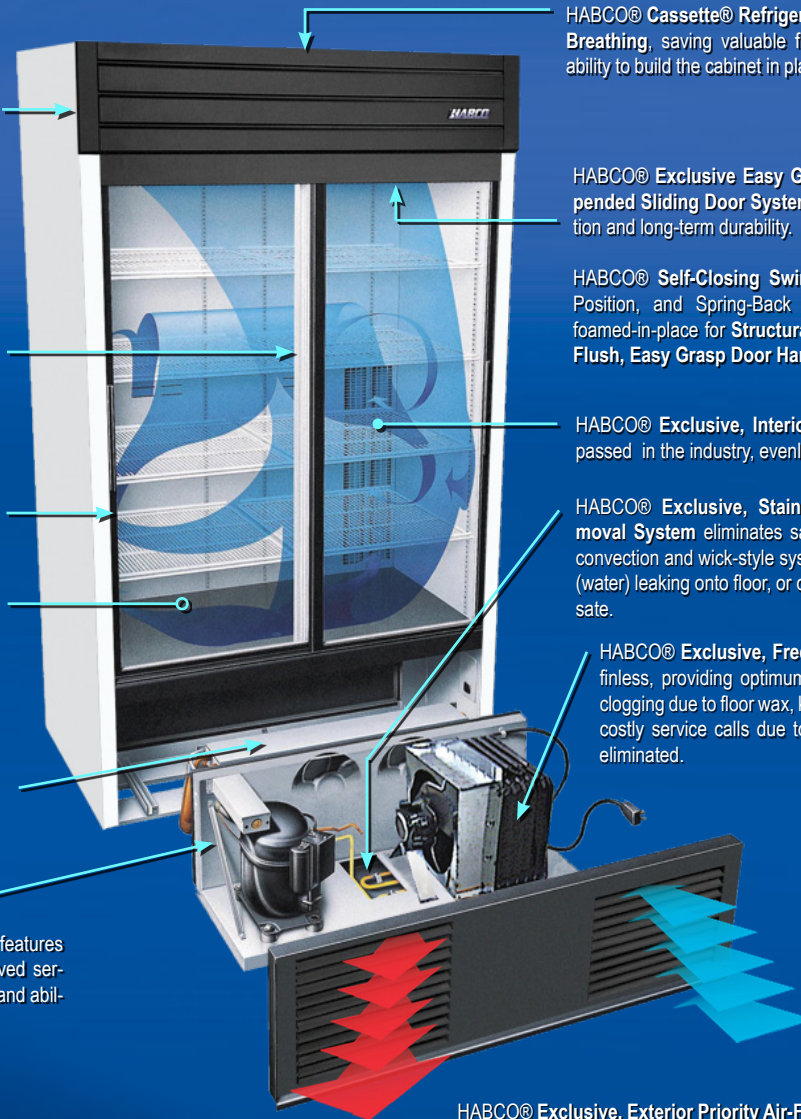

HABCO® incorporates **Energy Efficient LED Lighting System** for Glass Door Interior Display and respective Sign Merchandising.

Magnetic Side Seals on Doors ensure positive seal and closure.

All HABCO® premium reach-in refrigerators feature the **Benefit of Superior Efficiency Insulated Safety Glass**, which is 30% more efficient than triple-pane.

HABCO® provides **Vital Protection from Corrosion** and subsequent refrigeration failures by coating all food service SE model cooling coils.

HABCO® **Exclusive Cassette®** refrigeration features proven reliability while providing clients improved serviceability, sanitation, aftermarket cost savings and ability to upgrade the entire refrigeration system.

HABCO® Cassette® Refrigerators are **Completely Front-Breathing**, saving valuable floor space and providing the ability to build the cabinet in place at rear, top and both sides.

HABCO® **Exclusive Easy Glide, Low Maintenance Suspended Sliding Door System** provides maximum fluid motion and long-term durability.

HABCO® **Self-Closing Swing Doors** feature Hold-Open Position, and Spring-Back Protection. Solid Doors are foamed-in-place for **Structural Rigidity** and feature **Large, Flush, Easy Grasp Door Handles**.

HABCO® **Exclusive, Interior Priority Air-Flow** is unsurpassed in the industry, evenly cooling product.

HABCO® **Exclusive, Stainless Steel Condensate Removal System** eliminates sanitary issues associated with convection and wick-style systems. No worry of condensate (water) leaking onto floor, or corrosion due to acidic condensate.

HABCO® **Exclusive, Free&Clear™ Condenser Coil** is finless, providing optimum heat exchange air-flow. Coil clogging due to floor wax, kitchen grease and subsequent costly service calls due to matting of dust and lint, are eliminated.

HABCO® **Exclusive, Exterior Priority Air-Flow** is unsurpassed in the industry, for front-breathing heat exchange. No worry of rear ventilation spacing requirement.

\* Note: Full size Refrigerators and Freezers come standard with three (3) shelves per door.  
SE42 Double Sliding Door shown.
